

Aurora Electronics

Product Information Manual — Consumer Audio & Accessories Line

This document is the internal Product Information reference used by Customer Support for specification lookups, compatibility questions, and troubleshooting-adjacent product facts. Live pricing, SKU stock levels, and warehouse availability are NOT contained in this document — those are served from the Product Master structured database (see PIM schema, product_id join key).

Document version 3.2 | Last policy review: March 2026 | Internal use — Support & Training

1. AuroraBuds Pro 2 — True Wireless Earbuds

AuroraBuds Pro 2 is the company's flagship true-wireless earbud, positioned for customers who want active noise cancellation (ANC) with all-day comfort. It replaces the original AuroraBuds Pro and adds adaptive ANC, a larger driver, and multipoint Bluetooth pairing. Commonly bundled with the AuroraCharge Wireless Pad as a promotional set during festive sales.

Specifications

Specification	Detail
Product ID (link key)	AUR-EB-PRO2
Driver size	11mm dynamic driver
Noise cancellation	Adaptive ANC, up to 35dB reduction
Battery life (earbuds only)	Up to 7 hours (ANC on), 9.5 hours (ANC off)
Battery life (with case)	Up to 28 hours total
Charging	USB-C, Qi wireless charging supported
Charge time	10 min quick charge = 2 hours playback
Bluetooth version	5.3, multipoint (2 devices simultaneously)
Water resistance	IPX4 (earbuds), case not water resistant
Weight	5.4g per earbud, 42g case
Colors available	Obsidian Black, Pearl White, Sage Green
In-box contents	Earbuds, charging case, USB-C cable, 3 ear-tip sizes (S/M/L)
Warranty	1 year limited manufacturer warranty

Device Compatibility

Feature	iOS	Android	Windows/macOS
Basic playback / calls	Yes	Yes	Yes
Adaptive ANC control	Yes (app)	Yes (app)	No
Multipoint pairing	Yes	Yes	Yes

Firmware updates via app	Yes	Yes	No (use companion desktop tool)
--------------------------	-----	-----	---------------------------------

Common Support Notes

If a customer reports one earbud not charging, the most frequent root cause is misaligned case contacts rather than a defective unit — advise cleaning the charging pins with a dry cloth before authorizing a replacement. AuroraBuds Pro 2 is NOT compatible with the original AuroraCharge case (Gen 1); only the AuroraCharge Wireless Pad Gen 2 or later supports it.

2. AuroraWatch Fit 3 — Smart Fitness Watch

AuroraWatch Fit 3 targets the fitness-focused mid-range segment, competing on battery life rather than raw processing power. It is the successor to Fit 2, with an always-on AMOLED display added (previously optional) and improved SpO2 sensor accuracy.

Specifications

Specification	Detail
Product ID (link key)	AUR-WT-FIT3
Display	1.43" AMOLED, always-on option, 466x466 resolution
Case material	Aluminum alloy
Band size	Fits 130mm-220mm wrist circumference (standard band)
Battery life	Up to 9 days typical use, 5 days with always-on display
Charging	Magnetic pogo-pin dock, full charge in ~90 minutes
Water resistance	5 ATM (swim-safe, not for diving)
Sensors	Heart rate, SpO2, accelerometer, gyroscope, ambient light
GPS	Built-in dual-band GPS (no phone required for outdoor tracking)
Connectivity	Bluetooth 5.2; no cellular/LTE variant available
Colors available	Graphite, Rose Gold, Ocean Blue
In-box contents	Watch, charging dock, quick-start guide
Warranty	1 year limited manufacturer warranty

Device Compatibility

Feature	iOS	Android	Windows/macOS
Companion app (AuroraFit)	Yes (iOS 15+)	Yes (Android 9+)	No
Call/text notifications	Yes	Yes	N/A
Reply to messages from watch	No	Yes (Android only)	N/A
Music storage/playback	No	No	N/A

Common Support Notes

Reply-to-message from the watch face is an Android-only capability due to iOS notification API restrictions — this is expected behavior, not a defect, and is a frequent source of iOS customer complaints. The standard band is not compatible with AuroraWatch Fit 2; band lug width changed from 20mm to 22mm in the Fit 3 redesign.

3. AuroraSound Go — Portable Bluetooth Speaker

AuroraSound Go is an entry-level portable speaker aimed at outdoor/travel use cases. It is the highest-volume SKU in the accessories line by unit sales and is frequently gifted, which correlates with a higher-than-average post-purchase support volume around gifting/return timelines.

Specifications

Specification	Detail
Product ID (link key)	AUR-SPK-GO
Output power	20W RMS, dual driver + passive radiator
Battery life	Up to 16 hours at 50% volume
Charging	USB-C, 5V/2A input
Bluetooth version	5.1, single-device pairing only (no multipoint)
Water/dust resistance	IP67 (fully submersible to 1m for 30 min)
Weight	540g
Companion feature	PartyLink: pair 2 units for stereo (app required)
Colors available	Charcoal, Coral, Arctic White
In-box contents	Speaker, USB-C cable, carabiner clip
Warranty	1 year limited manufacturer warranty (water damage covered under IP67 claim only if unit was sealed)

Common Support Notes

PartyLink stereo pairing requires both units to be AuroraSound Go — it is not cross-compatible with other AuroraSound models. If a customer reports the USB-C port cover feels loose, this is a known cosmetic tolerance issue on early production batches (serials starting ASG-2401 through ASG-2403) and does not affect IP67 rating; do not treat as a defect unless water ingress is confirmed.

4. AuroraDesk Rise — Adjustable Laptop Stand

AuroraDesk Rise is a non-electronic ergonomic accessory (no battery, no firmware), which changes its support profile considerably compared to the other products in this catalog — most support queries relate to fit/compatibility and structural warranty rather than software or charging.

Specifications

Specification	Detail
Product ID (link key)	AUR-ACC-DESKRISE
Material	Aluminum alloy body, silicone grip pads
Compatible laptop sizes	10 inch to 17 inch
Max load capacity	10 kg (22 lbs)
Height adjustment range	110mm to 230mm, 6 fixed positions
Folded dimensions	260mm x 100mm x 30mm
Weight	780g
Colors available	Space Gray, Silver
In-box contents	Stand, carry pouch
Warranty	2 year limited manufacturer warranty (structural defects only)

Common Support Notes

The 10kg load rating assumes even weight distribution at the recommended hinge angle; customers reporting wobble at maximum height extension with laptops over 2.5kg should be advised to use one notch lower for stability — this is a usage note, not grounds for a defect replacement.

5. AuroraType K5 — Mechanical Keyboard

AuroraType K5 is a compact 75%-layout mechanical keyboard aimed at hybrid work/gaming users. It is offered in three switch variants, which is a frequent pre-sale and post-sale support question (switch feel, hot-swap capability, and noise level).

Specifications

Specification	Detail
Product ID (link key)	AUR-KB-K5
Layout	75% (84 keys), compact with dedicated function row
Switch options	Aurora Linear Red, Aurora Tactile Brown, Aurora Clicky Blue
Hot-swappable switches	Yes (3-pin and 5-pin compatible sockets)
Connectivity	USB-C wired, Bluetooth 5.0 (up to 3 devices), 2.4GHz dongle
Battery life (wireless)	Up to 200 hours (backlight off), 40 hours (backlight on)
Keycaps	PBT double-shot, OEM profile
Backlight	Per-key RGB, 18 effects, software customizable
Frame	Aluminum top plate, gasket-mounted
Weight	820g
Colors available	Onyx Black, Cloud White
In-box contents	Keyboard, USB-C cable, 2.4GHz dongle, keycap puller, switch puller
Warranty	1 year limited manufacturer warranty (switches excluded after hot-swap modification)

Device Compatibility

Feature	Windows	macOS	iOS/Android (BT)
Full key mapping / macros	Yes (software)	Yes (software)	No (BT keys only)
RGB customization	Yes	Yes	No
Firmware update	Yes	Yes	No

Common Support Notes

Once a customer hot-swaps switches, the switch-related portion of the warranty is void by design (stated in-box); the keyboard's electrical/PCB warranty remains valid. Bluetooth dropout complaints are most often resolved by confirming the customer is on firmware 1.2 or later, which fixed a known reconnection delay bug present in early units.
